

DESIGNING HEALTH DATA STRATEGIES FOR 21ST CENTURY HEALTHCARE

MAKING HEALTH DATA MORE ACCESSIBLE TO PROVIDE BETTER CARE FOR PATIENTS

This panel discussion will focus on the importance and value of the intensifying need for capturing and analysing health data in transforming care for Canadian patients. We know your engagement will add to the deliberations which we hope will result in a call for action that make better use of health data to inform personalized care strategies for patients.

This conference is part of an annual series hosted by Dean Reznick and the Faculty of Health Sciences at Queen's University. Our series is aimed at emphasizing the strategic importance of partnerships and collaboration with stakeholders in improving patient care.

PROGRAM AGENDA

Thursday, May 9th, 2019 | School of Medicine Building
